Standard Motor Products MCTS1 Engine Temperature Sensor

The best place to measure your Harley Davidson's engine temperature is at the cylinder head. That's where the Harley design engineers placed the Engine Temperature Sensor - in the fins behind the front cylinder head. If they wanted to monitor engine oil temperature they could easily have done that. But they choose to monitor head temperature.

Where to measure Harley engine temperature - oil or ...

Motorcycle Forums » Harley Davidson. An operating temp of 200- 210 degrees will extend the life of any V twin engine. If aircraft engines ran as hot as Harleys the FAA. would ground them. I still ride an ironhead sporty. That's why 60 weight oil gets used during summer and 20-50 gets used when it's cold.

Harley Davidson V-Twin Oil Temperature - CycleFish.com
